

Driver Connect: The Smarter Way To Learn

Drivers are used to being on the move. You need a learning platform that not only moves with them, but engages them in an interactive learning experience that is unlike any other.

Driver Connect brings online learning to an entirely new level because it's – just plain smart.

Drivers Engage in Learning

- ▶ Accessibility is one key to success. Drivers can log in from a desktop, mobile device and even through the satellite to take courses.
- ▶ Designed to be interactive, courses are effective for all learning styles and backgrounds.
- ▶ Participants choose from among full courses, refresher courses, and standalone knowledge tests.
- ▶ Drivers receive training tailored to their learning needs.

Managers Customize Training

- ▶ Easily manage user accounts, assign courses and report on progress.
- ▶ Print certificates, run reports, track compliance, and analyze trends by terminal, manager, or individual driver.
- ▶ Identify where training has been effective or where additional help is needed with powerful testing and assessment tools. This can be done across the fleet or with individual drivers.
- ▶ Use Driver Connect's full range of reporting and analysis tools to review and export data; and, create automated reports that are delivered directly to your inbox.

"For our drivers, the content is a lot easier to get into and to get through."

"I liked interacting with the content."

"Creating driver accounts and assigning content is a lot easier and takes a lot less time."

"I liked the manager functionality, especially the condensed reporting."
